## RING SIZE GUIDE

### Determine your ring size – using an existing ring

Please print this page at 100% scale without any resizing.

Ensure that "fit to page" or similar scaling options are disabled in your printer settings.

After printing, place a ruler on the measurement strip shown below.

The strip must measure exactly 1 cm to ensure accurate results.

1cm

### Step-by-step

**1. Select a reference ring**

Choose a ring you normally wear on the finger for which the new piece is intended.

**2. Positioning**

Place the ring over the size circles shown on the page.

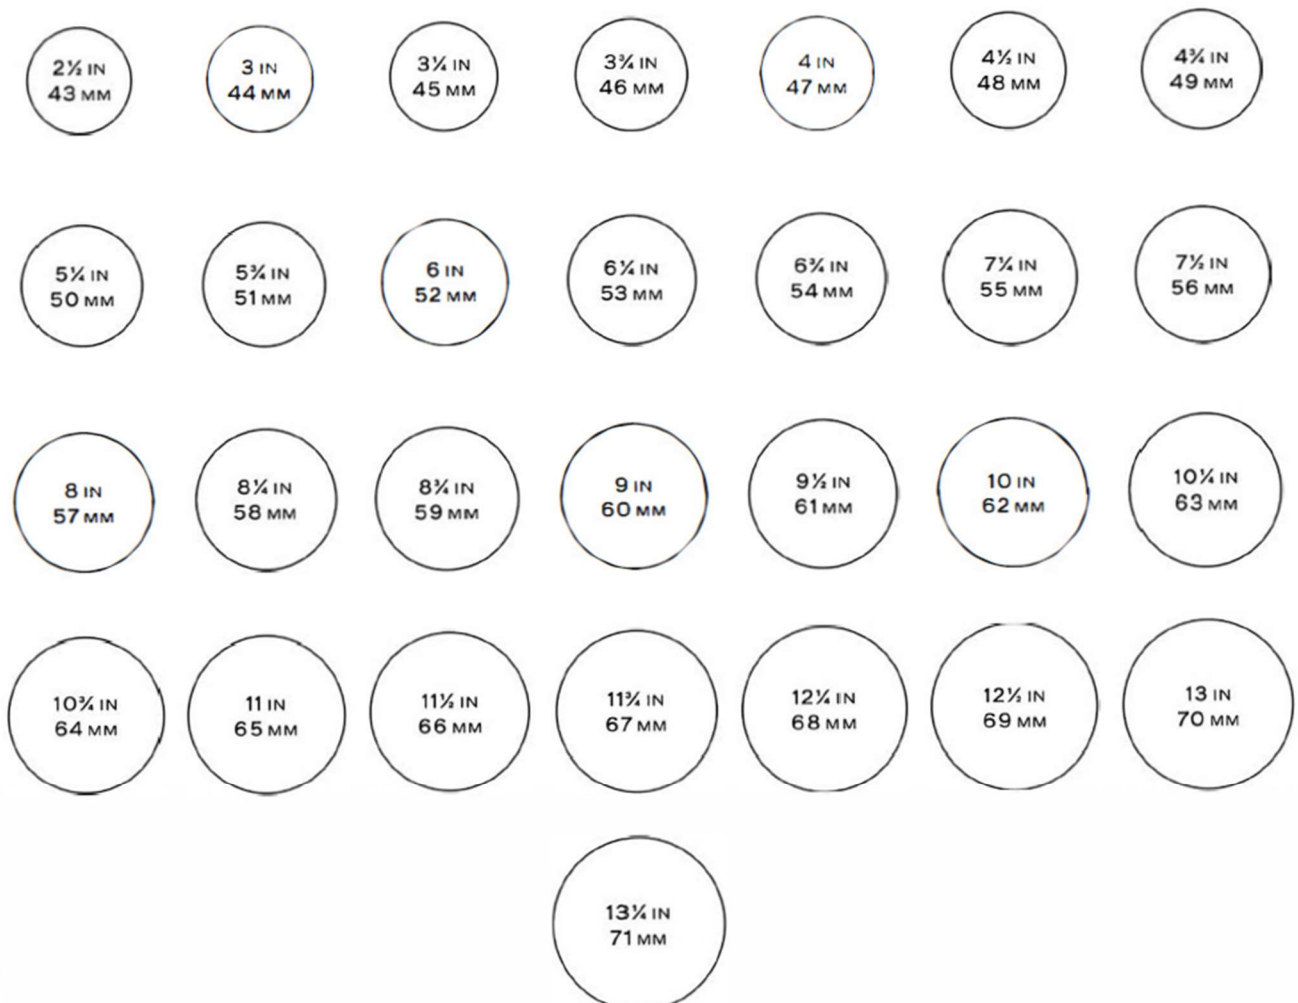

The correct size is reached when the outline of the circle aligns precisely with the inner diameter of your ring.

**3. Check**

The circle should remain fully visible inside the inner edge of the ring — without overlap and without gaps.

**4. Recommendation**

If your ring lies between two sizes, choose the larger size for a comfortable fit.

**Note:** Size determination is carried out at your own responsibility.  
IMPERARI cannot be held liable for individual deviations in size measurement.

## RING SIZE GUIDE

### Determine your ring size – without an existing ring

If you do not have a suitable reference ring, you can use a thin string or a narrow strip of paper.  
This method allows you to determine your finger circumference with precision.

#### Step-by-step

**1. Preparation**

Cut a narrow strip of paper or use a thin piece of string that can be wrapped comfortably around your finger.

**2. Apply**

Wrap the strip or string around the widest part of your finger — usually above the knuckle — and lay it flat and smooth.

**3. Marking**

Mark the point where the ends meet.

**4. Measure**

Place the marked strip on a flat ruler and measure the distance between the starting point and the mark.  
This value corresponds to the circumference of your finger.

**5. Determine size**

Compare the measured length with the size table below.

If your result falls between two sizes, select the larger size for a comfortable fit.

RING SIZE (EUROPE)	RING SIZE (US)	RING SIZE (JAPAN)	FINGER CIRCUMFERENCE IN MM
43	2 1/2	3	43
44	3	4	44
45	3 1/4	5	45
46	3 3/4	6	46
47	4	7	47
48	4 1/2	8	48
49	4 3/4	9	49
50	5 1/4	10	50
51	5 3/4	11	51
52	6	12	52
53	6 1/4	13	53
54	6 3/4	14	54
55	7 1/4	15	55
56	7 1/2	16	56
57	8	17	57
58	8 1/4	18	58
59	8 3/4	19	59
60	9	20	60
61	9 1/2	21	61
62	10	22	62
63	10 1/4	23	63
64	10 3/4	24	64
65	11	25	65
66	11 1/2	26	66
67	11 3/4	27	67
68	12 1/4	28	68
69	12 1/2	29	69
70	13	30	70
71	13 1/4	31	71

**Note:** Finger circumference changes slightly with temperature and throughout the day. Do not measure your finger when your hands are cold.

The most accurate measurement is taken at the end of the day, when the finger circumference is naturally at its largest. Ensure that you always measure at the widest part of the finger, typically above the knuckle.

This guide serves as an orientation.

IMPERARI assumes no liability for deviations in individual size determination.
